Course Description

Welcome to the comprehensive course on **ChatGPT** and **Prompt Engineering** for Software Development. This course is designed for **beginners** who want to learn how to use **ChatGPT for software development**. You will learn the fundamentals of ChatGPT, advanced prompt engineering techniques, and how to leverage them to boost your software development productivity.

Instructor Bio:
I am a software engineer with over 15 years of experience in the industry. I have worked on various projects and gained a wealth of knowledge and experience in software development. I am an experienced online course instructor who has trained many students on various software development topics, including API, .NET, Docker, Kubernetes, and Azure.

Topics covered:
- Get Started in ChatGPT from Scratch
- Prepare for Certifications using ChatGPT
- Prepare for Technical Interviews using ChatGPT
- Use ChatGPT with Docker
- Design Software Systems with ChatGPT
- Build Projects with ChatGPT
- Document using ChatGPT

What you will achieve:
- You will have a solid understanding of ChatGPT and advanced prompt engineering techniques.
- You can use ChatGPT to boost your software development productivity.
- You can design systems, programs, and documents with ChatGPT.

Who this course is for:
- Beginners who want to learn how to use ChatGPT for software development.
- Software developer, engineer, or someone who wants to learn how to use ChatGPT to boost your productivity in software development.

Prerequisite:
- Basic programming knowledge is recommended.

Enroll now and start your journey to becoming a ChatGPT and prompt engineering expert.
